Web Application for Medical Transcription

About Client

Global Transcripts is a medical transcription company which has been serving the healthcare industry worldwide for more than a decade. It offers a unique combination of experience and innovation. In today's competitive health care environment, the focus is on quality and cost-efficiency. Now more than ever, accurate patient records and efficient medical information management are important elements in any quality and cost-efficiency equation.

They understand that the service they provide is a vital connection between you and your patient. It's their job to understand and translate the language of medicine, accurately, efficiently, and professionally. And they do whatever it takes to get each job done to exacting standards! It's this type of commitment that has earned them wonderful reviews from their clients! Ask them for references and let them tell you about Global Transcripts!

They provide services of transcription such as Medical, News, and Conference Calls.

Business Need

Global Transcripts is a medical transcription company which deals in the process of converting the voice recorded reports as directed by physicians and/or healthcare professionals, into text format. The voice records transcription was completely a manual process.

Company wanted an automated process where the voice recorded file will get uploaded on the server, it will be assigned to different users to transcribe it depending upon their availability and send back to the client once transcribed.

Features

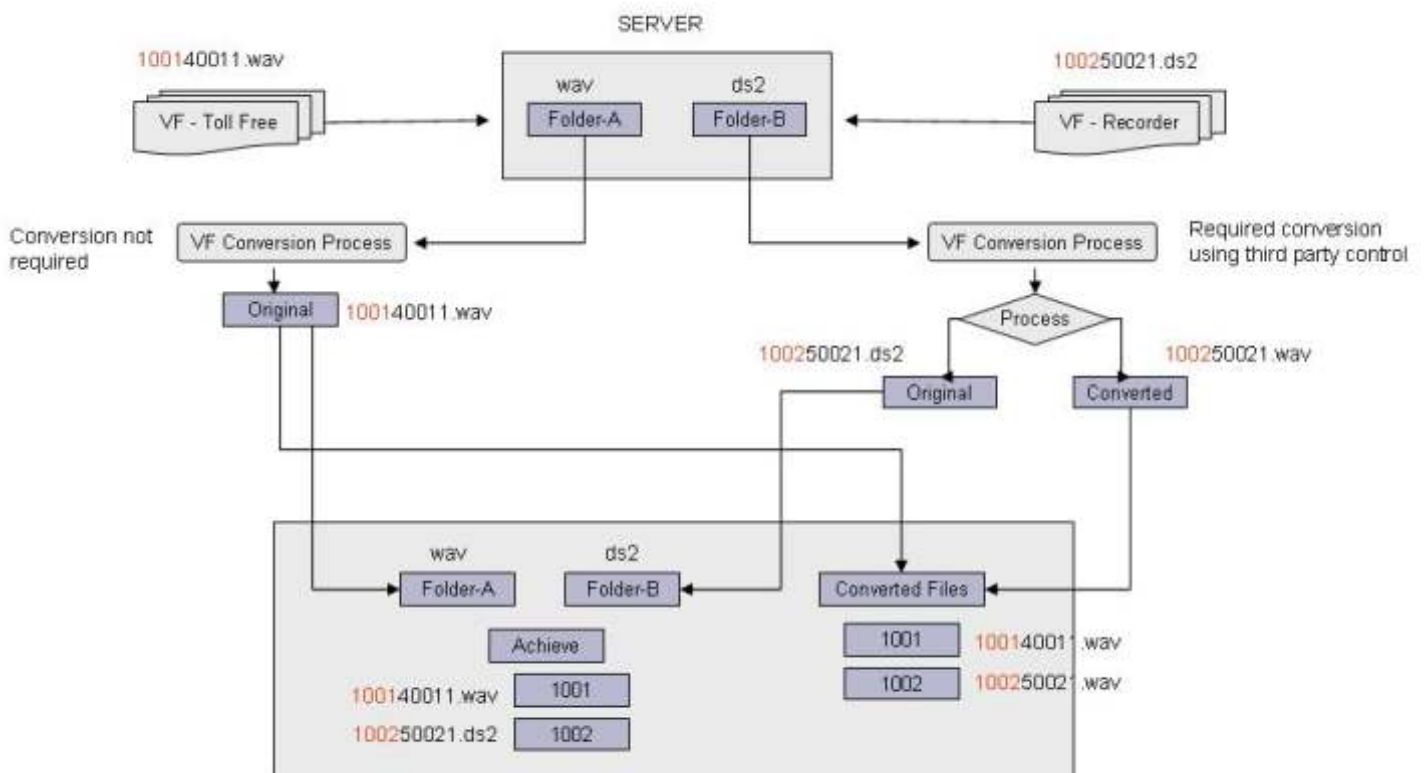

- Manage staff admin
- Manage branches
- Manage in-house medical transcriptionists
- Manage in-house editors
- Manage home based medical transcriptionists
- Manage home based editors
- Manage clients
- Manage masters and users and define access permissions
- Manage emails, templates
- Billing, Schedule, Notices, Notes, Reports, Rules

Our Solution

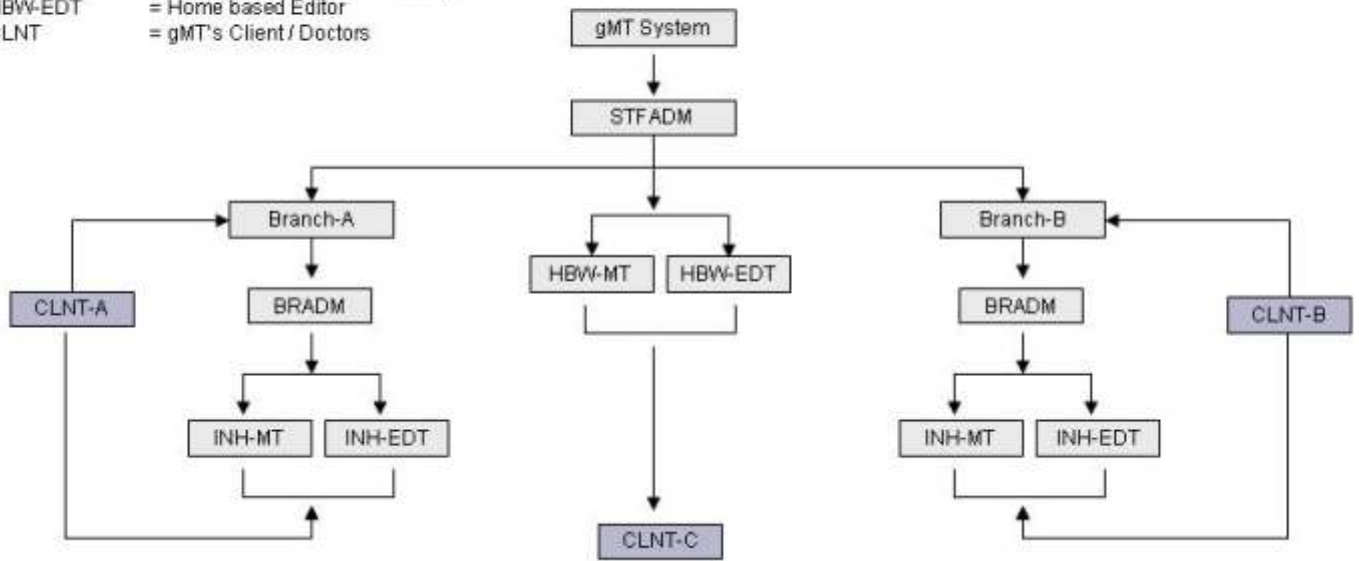

A web application was developed using Microsoft DotNet where the transcription process was automated in the following way.

Different User Types

Abbr.:

- STFADM = Admin Staff
- BRADM = Branch Head / Branch Admin
- INH-MT = In house Medical Transcript
- INH-EDT = In house Editor
- HBW-MT = Home based Medical Transcript
- HBW-EDT = Home based Editor
- CLNT = gMT's Client / Doctors
